Professional Summary

Computer Engineering student graduating in 2027 with hands-on experience developing scalable backend applications using Java, Spring Boot, REST APIs, Hibernate, MySQL, HTML, CSS, and JavaScript. Strong foundation in Data Structures, Object-Oriented Programming, and Software Engineering. Familiar with Python and AI fundamentals, with a passion for building scalable SaaS products and modern backend systems.

Education

ISB&M College of Engineering Expected 2027
Bachelor of Engineering in Computer Engineering Pune, India

Government Polytechnic, Miraj 2024
Diploma in Computer Engineering – 86.84% Maharashtra, India

Technical Skills

- **Languages:** Java, JavaScript, SQL, HTML5, CSS3
- **Frameworks:** Spring Boot, Spring MVC, Spring Security, Hibernate/JPA, JDBC
- **Backend:** REST APIs, JWT Authentication, CRUD Operations, API Integration, MVC Architecture
- **Databases & Tools:** MySQL, MongoDB, Git, GitHub, Postman, Docker, Eclipse, Redis
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Software Engineering, Problem Solving

Training

InfoBeans Foundation 2026
Java Full Stack Developer Trainee Pune, India

- Developed backend applications using Core Java, JDBC, Spring Boot, and MySQL.
- Built responsive frontend interfaces using HTML, CSS, JavaScript, and Bootstrap.
- Implemented Spring Security with JWT authentication for secure authorization.
- Utilized Git and GitHub for collaborative, Agile-based development tasks and code reviews.
- Developed reusable backend modules adhering to clean coding practices.

Projects

Rent Anything – Rental Management Backend API GitHub
Spring Boot, MySQL, JWT, Spring MVC

- Developed scalable REST APIs supporting User, Owner, and Admin roles.
- Implemented JWT authentication, role-based authorization, and Hibernate/JPA database persistence.
- Designed modular service, repository, and controller layers for maintainability and scalability.
- Tested REST APIs and endpoints comprehensively using Postman.

IBNextStep – Institute Placement Readiness & Recruitment Management System GitHub
Spring Boot, MongoDB, Spring Security, JWT, Redis, React, REST API

- Collaborated in a team to develop an enterprise-level placement and recruitment management platform for institutes.
- Worked as a **Backend Developer**, designing and implementing secure REST APIs using Spring Boot and MongoDB.
- Implemented JWT-based authentication, role-based authorization, input validation, and exception handling for Admin, Trainer, and Student modules.
- Developed backend modules including user management, notifications, dashboard APIs, and integrated MongoDB for efficient data storage.
- Collaborated with frontend developers by providing well-documented REST APIs and following Git-based version control workflows.

Certifications

Java Full Stack Development Certification – InfoBeans Foundation 2027

Web Development Fundamentals – IBM 2026
